

ALKALINE-500

CHLORINATED LIQUID ALKALINE DETERGENT

DESCRIPTION

ALKALINE-500 is a concentrated liquid chlorinated detergent containing potassium hydroxide, water softening compounds, anti-soil redeposition agents, stabilizers and foaming compounds, and chlorinating agent. **ALKALINE-500** is an excellent one-step cleaner and foamer for all types of applications in the food, dairy and beverage industries.

SPECIFICATIONS

pH 1% Soln.: Minimum 11.70
Form: Liquid concentrate
Foam: High
Effect on metals: Safe on steel and stainless, at use dilutions

APPLICATION

Recommended for foaming applications on equipment, floors and walls. Depending on soil makeup and content, use (2-6) ounces per gallon of water to foam on surfaces. Let stand (do not let dry on surface). Then rinse with high pressure wash.

DO NOT MIX WITH ACID! MIXTURE WILL RELEASE TOXIC FUMES!

For best results, consult your UNICORE technical representative.

FIRST AID

DANGER! CONTAINS POTASSIUM HYDROXIDE AND HYPOCHLORITE SOLUTION.

KEEP AWAY FROM CHILDREN
